

SHARKSKIN

OVERVIEW

All construction professionals know the importance of a quality roof system. That is why so much research, time and effort goes into specifying and installing the right roofing product for every building.

The SHARKSKIN ULTRA RADIANT® is designed to reduce energy costs by reducing attic temperatures, as well as being engineered to exceed industry standards for long term moisture protection as part of the SHARKSKIN™ family of patented state-of-the-art roof underlayments.

Thermally stable within the roof system while reflecting Ultra Violet rays away from the attic structure.

These days you can't afford not to install cost effective energy saving roofing components that also reduce the potential liability of using inferior tar paper roofing felts. Give your customers a cost effective, long term, energy saving roof system by starting with "The Ultimate Roof Underlayment" specify **Specify Sharkskin Ultra Radiant™**

SHARKSKIN
Ultra Radiant
The Ultimate Roof Underlayment

Developed to exceed 2008 California Energy Code requirements and Industry Standards for long term moisture protection!

Code Compliance

- ICC-ES AC188, AC48 & ICBO AC08*
- ESR Report 1708
- BOCA
- SBCCI
- Florida Building Code FL#8087 R-4
- Miami/Dade - HVHZ NOA 15-0421.10
- Exceeds ASTM D226

*Per tile roof installation instructions - www.sharkskin.us / roll labels

NEW

Radiant Barrier Insulating Roof Underlayment

Save Energy & Reduce Energy Bills!

Developed to exceed 2008 California Energy Code requirements and Industry Standards for long term moisture protection!

Benefits

Smart Investment

Long term moisture protection and reduced energy bills

Patented, State-of-the-Art

Energy Saving Radiant Barrier Insulating Underlayment

Helps to Reduce Attic Temperature

Reducing cooling cost

Installs with 3/8" Roofing Nails

Does not require plastic caps

Nail Sealability

Provides long term nail sealability per ICC-ES AC48.

High Tensile Strength

Provides a secondary water barrier if primary roof is blown off

Slip-Resistant

Even in wet or dusty conditions

Light Weight

Easy to lift, load, and work with
48" x 250' rolls - 10 SQS
55 lbs. per roll approx.

12 Month UV Exposure Rating

Will Not Rot

Will not rot, dry out or become brittle

Will Not Scar or Melt

NO Sticky Mess
Withstands high temperatures

SHARKSKIN *Ultra Radiant*

The Ultimate Roof Underlayment

The first and most important step toward an integrated roof system.

Description

Created specifically for tile, metal and slate (battened and counter battened) roof installations.* SHARKSKIN ULTRA RADIANT®'s patented design is the most important step towards an "Energy Saving Roof System" in the hot and abrasive roof environment. A roof system is only as good as its weakest link. SHARKSKIN ULTRA RADIANT® was designed to enhance the life of the roof while reducing energy costs by reflecting UV rays that heat attic spaces. Ideally suited for use with Tile, Metal, and Slate battened and counter battened roof systems. SHARKSKIN ULTRA RADIANT® is State of the Art when considering both energy savings and long-term moisture protection, durability and ease of installation.

*Sharkskin Ultra Radiant® Must be installed per manufactures installation instructions.
